PROFESSIONAL SUMMARY

Bilingual product professional with a STEM-designated Master of Technology Management from UC Santa Barbara College of Engineering, bringing product leadership across e-commerce, biotech consulting, and creator-facing platforms. Authored all 20 product design documents for Loomi, an e-commerce platform, translating 30+ customer discovery interviews into requirements that led affiliate partnerships across 10 networks and a \$150M market opportunity. Synthesized 80+ stakeholder interviews at the California NanoSystems Institute into a data-driven workforce training roadmap, pairing analytical rigor with fluent English/Spanish communication across multilingual teams.

EDUCATION

University of California, Santa Barbara | Santa Barbara, CA

Master of Technology Management, College of Engineering

June 2026

Bachelor of Arts, History of Art & Architecture

June 2025

EXPERIENCE

California NanoSystems Institute | Project Management Consultant | Santa Barbara, CA

December 2025 – June 2026

- Served as sole writing lead and faculty liaison, translating 80+ field discovery interviews into sequenced recommendations that shaped a workforce training roadmap for a federally-funded biofoundry
- Forecasted \$115,000 in annual operating expenses against \$510,000 in projected revenue for a proposed workforce bootcamp, defining success metrics that guided executive approval of the final program design
- Consulted directly with executive stakeholders including the Executive Director and Co-Principal Investigator, converting ambiguous, shifting priorities into concrete, data-driven deliverables over a 7-month engagement

UC Santa Barbara | Business Strategy Teaching Assistant | Santa Barbara, CA

September 2025 – December 2025

- Mentored 10+ student teams within a single quarter, breaking ambiguous business strategy problems into structured, actionable plans while meeting every project deliverable deadline against a fixed timeline
- Architected full course infrastructure from scratch on the Canvas platform, writing structured curriculum documentation that streamlined onboarding and business case development across two sections
- Administered stakeholder communications for 100+ students, adjusting register between undergraduates and faculty while resolving high-volume inquiries through clear written and verbal communication

College Sauce | Product Manager Intern | Santa Barbara, CA

September 2024 – March 2025

- Recruited and managed 30+ interns over two years, building Notion-based operating documentation and synthesizing customer feedback into a campaign generating 5,000 downloads and 8,500 acquired users
- Built strong working relationships with 2 UI/UX designers and an engineering team using Figma prototypes, translating detailed user feedback into shipped application revisions that grew daily active users past 1,000
- Validated new feature releases with the engineering team before campus-wide rollout, gathering direct customer feedback at 500-attendee events to confirm functionality and surface edge cases ahead of each launch

LEADERSHIP & PROFESSIONAL DEVELOPMENT

Loomi Apparel E-Commerce Platform | Product Management Lead | New Venture Competition

January 2026 – April 2026

- Researched affiliate commission structures ranging from 2.5% to 20% while tracking feature-level KPIs across 10 networks, surfacing partnership recommendations that shaped go-to-market sequencing for a \$150M eCommerce opportunity
- Authored all 20 product design documents totaling roughly 15.7K lines of spec, translating 30+ customer discovery interviews into detailed requirements the founding engineering team built 765 live products from
- Orchestrated a 7-agent AI coding workflow using an IDE-integrated assistant and an autonomous pair-programming agent that shipped 35 of 36 scoped issues in roughly 4 hours, deciding which agent output was good enough to ship

Docusrch AI File Management Market Research | Team Lead | American Marketing Association

January 2025 – April 2025

- Partnered directly with software engineers building an AI-powered file management tool, running competitive analysis to define a sequenced feature roadmap and translate ambiguous asks into buildable features
- Untangled technical constraints of an AI-powered search algorithm as resident problem solver, translating ambiguous user pain points into concrete technical requirements that guided the development team's feature priorities
- Co-led a 17-member team through a 100-student market research survey, devising three affiliate programs and finalizing client presentation materials while coordinating closely across design and engineering stakeholders

SKILLS

Technical Skills: Product Requirements Documentation, Market Research, Data Analysis, Business Case Modeling, Vendor Engagement Strategy, Financial Modeling, Product Roadmap Management, AI Tools (ChatGPT, Claude, Perplexity)

Core Skills: Cross-Functional Collaboration, Stakeholder Communication, Self-Starter, Analytical Mindset, Problem-Solving
